Dosage form	Water Soluble Powder
Target species	Poultry
Route	Oral, via drinking water / feed where stated

COMPOSITION

Each gram contains
Doxycycline as Hyclate...800mg
(As per innovator's specifications)

PRODUCT DESCRIPTION

The veterinary medicine "Doxykam 80 Powder," containing Doxycycline Hyclate is indicated for the treatment of bacterial infections in poultry.

Doxycycline hyclate is used to treat bacterial infections such as respiratory infections, enteritis, and chlamydiosis.

It belongs to the tetracycline class and inhibits bacterial protein synthesis by binding to the 30S ribosomal subunit, disrupting translation and preventing bacterial growth

INDICATIONS

- Gastrointestinal and respiratory infections caused by doxycycline sensitive microorganisms, like large number of Gram-positive and Gram-negative bacteria such as E.Coli, Salmonella, Pasteurella, Mycoplasma, Rickettsia, Haemophilus, Staphylococcus and Streptococcus spp., Campylobacter, and Chlamydia
- Birds suffering from respiratory Birds suffering from Birds suffering from Mycoplasma
- tract Infections. Enteric Infections. Infections.

DOSAGE & ADMINISTRATION

- 1 gram per 8-16 liters of drinking water for 3-5 days.
- Medicated drinking water should be used within 24 hours.

Prepare fresh medicated water and ensure uniform access for the flock.

PRECAUTIONS

Use Doxykam-80 Powder under veterinary supervision only. Do not exceed the recommended dosage. Avoid administering to birds with known hypersensitivity to doxycycline or other tetracycline antibiotics.
