

ANTIBACTERIAL

Enrokam C-10 Oral Solution

Oral Liquid

For veterinary use only

GENERAL INFORMATION

Product name	Enrokam C-10 Oral Solution
Dosage form	Oral Liquid
Target species	Poultry
Route	Oral, via drinking water

COMPOSITION

Each ml contains

Enrofloxacin 100 mg

Colistin Sulphate 0.50 MIU

(As per innovator's specifications)

PRODUCT DESCRIPTION

Role of Enrofloxacin

Enrofloxacin is effective against a variety of bacterial infections including respiratory and enteric infections. It belongs to the fluoroquinolone class and works by inhibiting bacterial DNA gyrase, thus preventing bacterial replication and aiding in the treatment of poultry bacterial diseases.

Role of Colistin Sulphate

Colistin sulphate is used as an antibiotic to treat bacterial infections, particularly those caused by Gram-negative bacteria. It is effective against respiratory infections, enteritis, and other bacterial diseases in poultry, often used when other antibiotics are ineffective or when treating multidrug-resistant bacteria.

INDICATIONS

- ENROKAM C-10 Oral Solution effectively treats gram-positive and gram-negative bacterial infections in the respiratory and gastrointestinal tracts of poultry. It is effective against colibacillosis, mycoplasma, CRD, E-coli, coryza, Pasteurella, salmonella, and staphylococcus.
- Colibacillosis Mycoplasma E-coli
- Coryza Pasteurella Multicoida salmonellosis
- Birds suffering from respiratory tract infections Birds suffering from Enteric Infections

DOSAGE & ADMINISTRATION

- 1 ml in 2 liters in drinking water for 3 days.
- In case of Salmonellosis continue 5 days.

Prepare fresh medicated water and ensure uniform access for the flock.

PRECAUTIONS

Use Enrokam C-10 Oral Solution under veterinary supervision only. Do not exceed the recommended dosage. Avoid administering to birds with known hypersensitivity to Enrofloxacin, Colistin Sulphate, or other antibiotics.

WITHDRAWAL PERIOD

Follow the approved product label and applicable regulatory requirements.
