Dosage form	Oral Liquid
Target species	Poultry
Route	Oral, via drinking water

COMPOSITION

Each gram contains

Methenamine.....950 mg

Vitamin B1... .8 mg

Vitamin B2.....9.2 mg

Vitamin K3..... 2 mg

(As per innovator's specifications) *

PRODUCT DESCRIPTION

Role of Methenamine

Methenamine is used as a urinary antiseptic to prevent and treat urinary tract infections. It works by releasing formaldehyde in acidic urine, which acts as a bactericidal agent against susceptible pathogens, aiding in the resolution of urinary tract infections.

Role of Vitamins

Vitamin B1 (thiamine) is vital for carbohydrate metabolism and nerve function, preventing neurological disorders like polyneuritis.

Vitamin B2 (riboflavin) is essential for energy metabolism, growth, and tissue repair, preventing poor growth and feather abnormalities.

Vitamin K3 (menadione) is crucial for blood clotting and bone metabolism, preventing hemorrhagic disorders and ensuring proper bone development.

INDICATIONS

- FLUSHKAM WATER SOLUBLE POWDER is used as strong urinary tract antiseptic in bacterial and fungal infections such as kidney infections, cystitis and other UTI. Additions of vitamins gives extra energy to birds and animals.
- Birds suffering from Urinary tract Infections

DOSAGE & ADMINISTRATION

- Poultry: 1gm per 1-2 liter of drinking water for 3-5 days. Or 10mg /kg live weight.
- Livestock: 5 g/ 100 kg body weight.
