

ANTIBACTERIAL

MAKFLOR C-23 LIQUID

Oral Liquid

For veterinary use only

GENERAL INFORMATION

Product name	MAKFLOR C-23 LIQUID
Dosage form	Oral Liquid
Target species	Poultry
Route	Oral, via drinking water

COMPOSITION

Each ml Contains

Florfenicol.....230 mg

Colistin Sulphate.....0.5 MIU

(As per innovator's specifications) *

PRODUCT DESCRIPTION

Role of Florfenicol

Florfenicol is a broad-spectrum antibiotic used to treat bacterial infections in poultry, particularly respiratory and enteric infections.

Makflor-23 Oral Liquid, containing florfenicol, that inhibits bacterial protein synthesis by binding to the 50S subunit of the bacterial ribosome, thus preventing peptide bond formation and ultimately leading to bacterial cell death

Role of Colistin Sulphate

Colistin sulphate is commonly used in veterinary medicine for birds to combat bacterial infections, particularly those caused by Gram-negative bacteria. It is effective in treating respiratory infections, enteritis, and other bacterial diseases in poultry
