

ANTIBACTERIAL

# Oxykam-95% water soluble powder

## Oral Liquid

For veterinary use only

### GENERAL INFORMATION

|                |                                 |
|----------------|---------------------------------|
| Product name   | Oxykam-95% water soluble powder |
| Dosage form    | Oral Liquid                     |
| Target species | Poultry                         |
| Route          | Oral, via drinking water        |

### COMPOSITION

Each gram contain  
Oxytetracycline HCL..... 950mg  
(USP specification)

### PRODUCT DESCRIPTION

Oxykam is a veterinary medicine available in the form of a 95% water-soluble powder. Each gram of the powder contains 950mg of Oxytetracycline Hydrochloride (HCL). Oxytetracycline is a broad-spectrum antibiotic that inhibits the growth of bacteria by interfering with their protein synthesis.

The water-soluble powder formulation is designed for easy dissolution in water, allowing for convenient administration to animals. This versatile antibiotic is suitable for various species and is particularly effective against a wide range of gram-positive and gram-negative bacteria.

Oxykam is intended for use under veterinary supervision to treat and control bacterial infections in animals.

It is crucial to follow the recommended dosage and administration guidelines provided by a veterinarian to ensure optimal effectiveness and minimize the risk of resistance development.

### INDICATIONS

- Oxykam, with its active ingredient Oxytetracycline Hydrochloride (HCL) at a concentration of 950mg per gram in a 95% water-soluble powder, is indicated for the treatment and control of bacterial infections in veterinary medicine.
- Respiratory Infections: Oxykam may be used to address bacterial infections affecting the respiratory system in animals, including pneumonia and bronchitis.
- Urinary Tract Infections: It is effective in treating bacterial infections in the urinary tract, aiding in conditions such as cystitis.
- Gastrointestinal Infections: Oxykam can be utilized to combat bacterial infections in the digestive system, helping manage enteritis and other gastrointestinal issues.
- Skin and Soft Tissue Infections: The medicine may be prescribed for bacterial infections affecting the skin and soft tissues, contributing to the recovery from wounds and abscesses.

### DOSAGE & ADMINISTRATION

- Prevention: 1 gm per 8 liter of drinking water
  - Treatment: 1 gm per 4 liter of drinking water
- Prepare fresh medicated water and ensure uniform access for the flock.

### PRECAUTIONS

Use under veterinary supervision. Do not exceed the recommended dosage.

### WITHDRAWAL PERIOD

Poultry: (For meat) 6 days.

### INSTRUCTION

### STORAGE

Store in a cool, dry place, protected from direct sunlight and moisture. Keep out of reach of children.

### PACKAGING

Refer to the approved commercial pack label for pack size, batch details, manufacturing date and expiry date.

**IMPORTANT:** This sheet summarizes supplied product literature. Always follow the current approved pack label, veterinary direction and applicable regulatory requirements.
