Water Soluble Powder

Vitamin A

Vitamin D3

Vitamin E

Vitamin K3

Vitamin C

**Essential
Vitamins for Health,
Growth, and Recovery**

MAK FIVEVIT

میک فائیو وٹ

(پانی میں حل پذیر پاؤڈر)

COMPOSITION:

Each gram contains:

Vitamin A	20,000 IU
Vitamin D3	2,000 IU
Vitamin E	6 mg
Vitamin K3	5 mg
Vitamin	5 mg
(As per innovator's specifications)*	

Role of Vitamin A (Acetate):

Vitamin A plays a crucial role in the health and well-being of birds, serving various physiological functions essential for the growth, development, and maintenance of numerous bodily systems.

Role of Vitamin D3 (Cholecalciferol) in birds:

Vitamin D3 plays a crucial role in maintaining optimal health in birds. It regulates calcium levels, ensuring strong bones, beak, and eggshell formation.

Role of Vitamin E (Tocopheryl Acetate):

Vitamin E is an essential nutrient for birds, playing a vital role in various physiological processes. It functions primarily as a potent antioxidant, protecting cells and tissues from oxidative damage caused by free radicals and reactive oxygen species. Additionally, vitamin E is involved in immune function, reproduction, and neurological health. In birds, vitamin E deficiency can lead to muscular dystrophy (also known as "crazy chick disease" in poultry), impaired immune function, reproductive problems, and neurological disorders.

Role of Vitamin K3 (Menadione):

Vitamin K3, also known as menadione, plays a crucial role in avian health as it is essential for proper blood clotting. Vitamin K3 has been suggested to have some antioxidant properties and may contribute to overall oxidative balance in birds.

Role of Vitamin C (Ascorbic Acid):

Vitamin C, also known as ascorbic acid, plays several important roles in avian health. It acts as an antioxidant, protecting cells and tissues from oxidative damage caused by free radicals and reactive oxygen species. Additionally, vitamin C is essential for collagen synthesis, which is important for maintaining the integrity of blood vessels, skin, and connective tissues. In birds, vitamin C also supports immune function, enhances iron absorption, and plays a role in the metabolism of amino acids and neurotransmitters.

Indications:

Mak Fivevit Water Soluble Powder reduce all types of stress, post treatment after coccidiosis, worm infection, bacterial and viral infection to maintain body resistance and productivity during the course of reconvalescence period of all disease in poultry. Growth among chickens, improve egg production, hatchability, steady growth, improve infertility, control loss of blood during debeaking and coccidiosis, improve resistance against infection and parasitic infestation.

Birds suffering from skin and feather problems.

Birds suffering from wound healing problems.

Birds suffering from reproductive issues.

Treatment Protocol with Mak Fivevit

DOSAGE:

1 gm in 1-4 liters of drinking water for 7 days

Note: Dose may vary on basis of requirement and flock condition.

Precautions:

Consult a veterinarian before treatment.

Avoid overdose. Store in a cool, dry place.

Keep out of reach of children. Use within the expiration date.

Hypersensitivity to any ingredient. Severe liver or kidney disease.

Packaging: Mak Fivevit: Available in 1 Kg, 2.5 Kg & 5 Kg.

علامات:

میک فائیو وٹ پانی میں حل پذیر پاؤڈر مرغیوں میں دباؤ کم کرنے، بیماریوں کے بعد مدافعت بحال کرنے، نشوونما بڑھانے، انڈوں کی پیداوار، اور قابل افزہ گی صلاحیت بہتر بنانے میں مددگار ہے۔ یہ بیماریوں کے خلاف مدافعت کو مضبوط کرتا ہے۔
