Treatment Protocol with MAKLIV Solution for Birds:

Dosage:

Prevention: 1 ml per 4 liters of drinking water.

Treatment: 1 ml per 2 liters of drinking water.

Withdrawal Period:

Not applicable for this product as it is intended for continuous supplementation in bird diets.
Always consult with a veterinarian for accurate diagnosis, proper treatment recommendations, and guidance on the use of MAKLIV Solution for birds.

ROLE OF Role of L-Carnitine:

L-Carnitine is important in poultry as for energy production, supporting muscle function, growth, and overall metabolic health.

Role of Betaine HCl:

Betaine HCl is utilized in poultry as supports liver function, nutrient utilization, and overall health, particularly during periods of stress or heat stress

Role of Inositol:

Inositol plays a crucial role in poultry as it supports reproductive health and feather quality

Role of Choline Chloride:

Choline chloride is essential in poultry as it plays a crucial role in maintaining overall health, growth, and egg production.

Role of Sorbitol:

Sorbitol is utilized as a sweetening agent and a mild laxative. It helps improve palatability in oral medications and aids in regulating bowel movements, promoting gastrointestinal health in poultry.

Role of Magnesium Sulphate:

Magnesium sulphate is utilized to maintain electrolyte balance and overall health in poultry.

INDICATIONS:

MAKLIV Solution is recommended for treating poultry conditions like fatty liver syndrome, hepatitis, and metabolic disorders. Specifically targeting hepatocellular, protects the liver against ill effect toxins, promotes growth and weight improvement in poultry. This liquid nutritional supplement aids in balancing fat depositions, correcting digestive disturbances caused by high-energy diets.

PACKAGING:

MAKLIV available in 1 litre, 5 litre
