MPROKAM-90

Powder

ایم پروکیم-۹۰
(پاؤڈر)

COMPOSITION:

Each gram contains:
Amprolium HCl 900 mg
(USP Specifications)

Role of Amprolium HCl:

Amprolium HCl is commonly used in veterinary medicine for birds as a coccidiostat to prevent and control coccidiosis, a common intestinal protozoan infection. It works by inhibiting the growth and reproduction of coccidia, helping to reduce morbidity and mortality associated with the disease in poultry.

Indications:

MPROKAM-90 Powder is used for the treatment of intestinal coccidiosis caused by *Eimeria* spp susceptible to Amprolium. By preventing and treating coccidiosis, **MPROKAM-90** Powder supports optimal growth performance and feed efficiency in poultry.

Birds suffering from Coccidiosis Disease

Caecal coccidiosis caused by *Eimeria* spp

Treatment Protocol with MPROKAM-90:

DOSAGE:

Prevention: 1 gm per 16 litre of drinking water

Treatment: 1 gm per 8 litre of drinking water
