Sintolin Plus

Oral Powder

سنتولن پلس
(اورل پاؤڈر)

Composition:

Each gram contains:

Lincomycin as HCl 50 mg

Spectinomycin as HCl 75 mg

Spiramycin Adipate 25 mg

Bromhexine HCl 5 mg

(As per Innovator's specifications)

Role of Lincomycin HCl: An antibiotic from the lincosamide class that inhibits bacterial protein synthesis by binding to the 50S ribosomal subunit. Effective against Gram-positive bacteria such as Staphylococcus, Streptococcus, and Clostridium, it treats respiratory, skin, and soft tissue infections in birds.

Role of Spectinomycin HCl: An aminoglycoside antibiotic that inhibits protein synthesis by binding to the 30S ribosomal subunit. It targets Gram-negative bacteria like E. coli and Pasteurella multocida, treating respiratory, urinary, and reproductive tract infections.

Role of Spiramycin Adipate: A macrolide antibiotic that inhibits protein synthesis by binding to the 50S ribosomal subunit. Effective against Gram-positive bacteria and Mycoplasma species, it is used for respiratory and systemic infections.

Role of Bromhexine HCl: A mucolytic agent that thins and loosens mucus in the respiratory tract, aiding in the treatment of respirator infections and congestion.

Indications for Sintolin Plus Oral Powder in Birds: SINTOLIN Plus Oral Powder is oral powder which is highly effective in mycoplasma, Pneumonia, Enteritis, E-coli, Coryza, typhoid and pasteurellosis in poultry. It is induced in GIT infections, respiratory tract infection, Urogenital infections, secondary bacterial infection during viral disease in poultry.

Treatment Protocol with Sintolin Plus Oral Powder In Birds:

DOSAGE:

Poultry:

Treatment: 1 gm per 2 liters of drinking water for 3- 5 days.
